

Our Green Commitment

All of the Inn's Guest Rooms Currently Have:

- 100% energy-saving fluorescent lighting
- Water-saving massaging showerheads
- Energy efficient windows
- Energy efficient thermostatically controlled heat/ac units or split air ductless mini heat pumps
- EPA compliant recycled green toilet tissue and facial tissue
- Separate recycling and garbage waste bins
- Stylish refillable shampoo dispensers that eliminate wasteful plastic bottles
- Waste-reducing vegetable based, cruelty-free soap that's already missing it's unused middle. Recycled packaging is printed with soy ink
- Natural body moisturizer made of corn-based biodegradable oil

Other Areas:

- 100% energy saving fluorescent lightning in common areas
- Pilotless energy efficient gas water heaters
- Active recycling program for paper, cardboard, glass and plastics
- 100% fluorescent, low voltage and low sodium lighting outside

Our Current and Future Initiatives Include:

- Switching to green-certified cleaning products by end of 2008.
- Replacing old carpeting in some of our suites with eco friendly, hypoallergenic materials, eventually replacing all carpeting throughout the Inn over the next few years.
- Replacing existing continental breakfast plates, utensils, coffee cups, napkins with biodegradable and compostable items
- Offering fair trade coffee products in our breakfast room and for our inn-room coffee makers
- Renovating the restaurant bathrooms to include water-free urinals, touch free sinks and toilets with electronic sensors, electric energy efficient hand dryers
